Venue: Palacio de Congresos de Madrid

## INVITATION

It is for me an honor to assume the responsibility of Chairing the Organizing Committee of this meeting organized by FEAPA and SEDAR and which will taking place in Madrid in November 2004

The joining of efforts and interests of both entities have made it easier to fix ambitious objectives both in dissemination of knowledge and of experiences in Pediatric Anesthesia to its enhancement relevant national and international experts will be invited.

I would like this lines to serve as an invitation to our colleagues world wide to pactively participate in this Madrid Meeting, known as a welcoming city and offering a richness of culture and history

See you in November 2004

Antonio Perez Gallardo  
President of the Organising Committee

## VENUE

**Palacio de Congresos de Madrid**  
Paseo de la Castellana, 99 - 28046 Madrid. Spain  
Tel: +34 91 3378100 / 01 - Fax: +34 91 5971094

Buses E.M.T. 5, 9, 14, 27, 40, 43, 120, 147, 149 y 150  
Metro: estación Santiago Bernabeu (Línea 10)  
Railway Station: estación Nuevos Ministerios  
Parking: In the basements of the building

## SCIENTIFIC PROGRAM

### THE FUTURE OF PEDIATRIC ANAESTHESIA

- Pediatric Anaesthesia, full speciality or subspeciality.
- Medical Education in Pediatric Anesthesia. Who and where should it take place?

### ANESTHESIA AND THE AIR TRACK

Handling of the air track (Part I)

- Diagnosis of the difficult track
- Management of the Fibronscopy for
- Pharyngeal devices of the air track
- Tracheo-bronchial devices, intubation and selective blockage

Anesthesia in children with respiratory difficulties (Part II)

- Evaluation of the respiratory function in the child
- Management of patients with obstruction in superior air track/windpipe
- Management of patients with infection in superior air track Should programmed surgery be delayed?
- Anesthesia implications in lung diseases

### MECHANICAL VENTILATION

- Spontaneous breathing Vs. Controlled during anesthesia. Where and how?
- Ways of mechanical ventilation in pediatric anesthesia. Indications
- Adapting the mechanical ventilation to the different types of surgery, cardiac, pulmonary, neurological, laparoscopy.
- Complications in mechanical ventilation

### ANESTHESIC DRUGS

- Sevofluorane. New ways of administration
- New drugs in pediatric anesthesia. Remifentanillo, Mivacurio, Desfluorane
- Local anesthetics: Bupi – Bupivacalm, Which should we choose?
- New uses for old drugs: Ketamina, Naxolone, Klonidina

### MONITORING

- Electrophysiological monitoring: TOF, BIS, Potentials. Their clinical usefulness.
- How to monitor organic perfusion
- Respiratory monitoring: Flow curves/volume and

### ANESTHESIA OUTSIDE THE OPERATING ROOM

- Anesthesia considerations for radiodiagnostic studies.
- Anesthesia considerations for digestive endoscopy and respiratory procedures.
- Anesthesia considerations for cardiologic diagnostic and therapeutic procedures.
- Anesthesia considerations for dental procedures

### FLUID ADMINISTRATION, COAGULATION AND HEMOSTASIS

- Perisurgical coagulation and hemostasis
- Controversies of the perisurgical fluidotherapy. Transfusion criteria. Trends in transfusion therapy.
- How to reduce perisurgical hemorrhage.
- Liquid Supply in Jehova followers. Practical aspects

### REGIONAL ANESTHESIA, ACUTE PAIN

- Advances in regional pediatric anesthesia. New techniques, new procedures.
- Central blockage in the treatment of postsurgical thoracic pain
- Troncal and peripheral blockages in the treatments. Postsurgical pain.
- Strategies facing acute tolerance to opiates.
- Prevention and treatment of complications

### CHRONIC PAIN

- The Anesthetist's role in pediatric chronic pain
- Locoregional strategies for children with chronic pain.
- Quality indicators in pain units
- Hospital economic consequences of pain units

### ANESTHESIA IN SPECIAL SITUATION

- Anesthesia and miopathies. Any advances?
- Anesthetic considerations related to the pre-term neonate.
- Advanced vital presurgical support in pediatric surgery.
- Malign hipertemia. How to prevent it.

### THE POLITRAUMATIZED CHILD

- The politraumatized child. Childhood corresponding characteristics.
- Initial evaluation and reanimation in pediatric multiple trauma.
- Performance of the anesthesiologist in
